ESG Guidelines

Environmental
(Renewable energy, management of solid waste/sanitation, reduction of emissions, protection of natural resources)

- Rebalance of the Transportation system (more railways and waterways)
- Concessions for greater protection of natural resources (forests, parks)
- Auctions of energy generation based on renewable sources (hydroelectric, wind, solar photovoltaic and biomass)
- Sanitation concessions and their positive impacts in reducing pollution
- Social and environmental impacts assessment (support to environmental processes)

Social
(Public policies, social rights)

- Fostering private investments to expand and improve the provision of public services
- Compliance with the guidelines of Convention 169/1989 of the International Labor Organization (ILO): the right of indigenous and tribal peoples to be informed and previously consulted
- Sanitation concessions and their positive impacts on health and educational indicators

Governance
(coordination, control, risk management, transparency)

- Balance in the distribution of risks and responsibilities in concession contracts
- Legal security
- Transparency in project preparation
